

YOUR PRIVATE INTRANET

# One secure home for everything worth sharing

DocurAI Intranet is your own private space to store and share documents, files and photos with the people who matter — safely hosted in Europe, reachable anywhere, and simple enough for everyone to use. Not a Big Tech platform: your data is never mined, never shared, and never sent to US cloud infrastructure.

EU-Hosted

GDPR by Design

Encrypted Storage

Zero US Cloud

## Documents

[Upload Document](#)

| Title                             | Category    | Status           | Size  |
|-----------------------------------|-------------|------------------|-------|
| Client NDA Template               | Contracts   | Indexed          | 21 KB |
| New Employee Onboarding Checklist | HR Forms    | Indexed          | 29 KB |
| Q3 2026 Newsletter                | Newsletters | AI summary ready | 22 KB |

### Full-text search, even in scans

Find any document by its content — not just its filename. Built-in OCR reads scanned PDFs, so paperwork is searchable the moment it's uploaded.

### Organized by design

Categories, descriptions and sortable views keep policies, newsletters, forms and contracts easy to browse and even easier to find.

### Role-based access

Administrators, Contributors and Readers by default — with optional group- and category-level permissions for teams that need finer control, available today.

# Built for the people you share with

Whether it's your family's memories or your organization's policies — DocurAI Intranet adapts to who's using it, with the same private, European foundation underneath.

## For individuals & families

### PERSONAL USE

Keep your family's memories in one place. Share holiday photos, videos and important paperwork with loved ones — privately, without handing your life over to Big Tech.

- ✓ Photos & videos, beautifully organised
- ✓ Passwords, contracts & family paperwork in one safe place
- ✓ Invite loved ones — you decide who sees what
- ✓ Automatic AI summaries for every document — generated locally, never shared

## For clubs, non-profits & businesses

### TEAM USE

Give your members and team a single source of truth. Share policies, newsletters, regulations, minutes and forms — always up to date, always secure, always yours.

- ✓ Policies, regulations & handbooks everyone can find
- ✓ Newsletters, minutes & forms shared in seconds
- ✓ Onboard members & staff with role-based access
- ✓ Automatic AI summaries for every document and newsletter — generated locally, never shared
- ✓ Publish news updates in-app, or forward newsletters by email — filed and indexed automatically

### Where is my data stored?

Exclusively in European datacenters. We will not host your data on US cloud infrastructure.

### Is it GDPR-compliant?

Yes, by design — hosted in the EU with no US cloud dependency, meeting strict European privacy rules.

### How does access work?

One admin adds Contributors or Readers. Need finer control? Optional group- and category-level permissions are available today.

### Not Big Tech

Unlike Google Drive or Dropbox, your data is never mined, never shared, and never leaves Europe.

### Deleted something by mistake?

Deleted files go to a Recycle Bin and stay recoverable for 30 days by default before permanent removal.

### Newsletters by email?

Give a mailing list its own address — approved senders' emails are filed, indexed and optionally summarized automatically.

DocurAI is intended for internal documents (e.g., company policies, newsletters, family photos). It is not designed for sharing Special Categories of Personal Data (SCPD) under the GDPR, such as medical or patient records. DocurAI Pro will cover all this and more, including Records Management, and is currently in development.
